Zunain Ali Azam

Software Engineer

Karachi, Pakistan | P: (+92) 3323077061 | zunainazam456@gmail.com | Zunain Ali Azam - LinkedIn | ZunainAliAzam · GitHub

SUMMARY

Software Engineer with nearly two years of experience in frontend and full-stack web development using Next.js, Angular, Node.js, Nest.js and TypeScript. Skilled in building scalable web applications, developing reusable UI architectures, creating backend services, writing unit, integration, and end-to-end tests, performance optimizations, implementing technical SEO, and CI/CD-driven deployment workflows.

SKILLS

Languages & Frameworks: JavaScript, TypeScript, React.js, Next.js, Angular, Redux, TanStack Query, TailwindCSS
UI & Architecture: Component-Based Architecture, Reusable UI Components, Responsive Design, REST API Integration, Cross-Browser Compatibility, Arabic RTL / English LTR, Internationalization (i18n)
Testing: Vitest, React Testing Library, Playwright (E2E), MSW (API Mocking)
Backend & Data: Node.js, Nest.js, Express.js, REST APIs, MongoDB, MySQL, Firebase, Prisma ORM
Engineering: Git, Monorepo, CI/CD, Agile/Scrum, Performance Optimization, Technical SEO, Cross-browser Testing, Debugging, Root Cause Analysis

WORK EXPERIENCE

IOMechs Karachi, Pakistan
Software Engineer Feb 2025 - Present

- Contributed to Estenarh (80000+ users) by developing and maintaining Admin dashboards and customer-facing modules using Angular, Angular Material and Tailwind CSS.
- Improved Estenarh's search visibility and frontend maintainability by resolving Technical SEO issues and leading migration efforts from Next.js v14 to v16.
- Developed and maintained extensive bilingual UI experiences for English LTR and Arabic RTL, implementing i18n across customer-facing and administrative interfaces while ensuring consistent, responsive layouts and reusable components across both languages.
- Designed and implemented analytical dashboards tracking client acquisition, retention rates, bookings, and revenue metrics for consultants and platform-wide performance, replacing manual reporting and reducing reporting effort by ~30–40%
- Migrated Estenarh Admin from Angular v14 to v17 through structured refactoring, improving scalability, UI consistency, and long-term maintainability.
- Contributed to IMS and Admin workflows for AZM using Angular, Angular Material and reusable component architecture, streamlining internal operational processes.
- Stabilized NowCut Admin and Shop portals by resolving 12+ production issues and delivering new features within a monorepo setup using Next.js, TailwindCSS and TanStack Query.
- Collaborated with backend and QA teams across multiple products to validate API integrations and catch regressions ahead of production releases.

Infinity Solutions Karachi, Pakistan

Frontend Developer Jun 2024 - Jan 2025

- Developed and maintained an e-commerce admin dashboard using React, Redux Toolkit, and Tailwind CSS for order and operational management workflows.
- Built multiple responsive client websites with cross-browser compatibility and mobile-first implementations.
- Implemented centralized state management and API integration flows using Redux Toolkit, improving frontend data handling and scalability.
- Worked closely with backend and QA teams to streamline testing and deployment cycles.

National Center for Cyber Security - NED Karachi, Pakistan

Frontend Developer Intern Jan 2024 - Apr 2024

- Contributed to the development of 4ormation, a remote hiring platform, using HTML, CSS, Bootstrap, and JavaScript.
- Implemented frontend forms, navigation flows, and API integrations to support candidate and recruiter workflow

PROJECTS View All

Calyndrs Built a scalable event management and discovery platform for organizers to create, manage, promote, and analyze events, covering event creation, RSVPs, payments, and attendee engagement. Wrote unit tests (Vitest) for authentication and calendar CRUD flows, integration/E2E tests (React Testing Library, Playwright) for authentication, and used MSW to mock API integrations during testing.

InsightEdu, Developed a full-stack AI-powered EdTech platform using React, TypeScript, Tailwind, and Firebase to enable real-time attentiveness tracking and personalized analytics in online classrooms. Integrated MediaPipe to monitor student activity during sessions, and used Node.js with Express to build secure APIs for managing users, meetings, and reports. Implemented automated email notifications via Brevo, enhancing student engagement and providing actionable insights for educators.

Propertease Developed a full-stack Real Estate platform with React, SCSS, Node.js, Express, and MongoDB, featuring JWT authentication, property listings, and real-time WebSocket-based chat.

EDUCATION

University of Karachi Karachi, Pakistan

Bachelors in Computer Science

CERTIFICATES

AI for Everyone, *Deeplearning.AI*

Javascript Algorithms and Data Structure, *FreeCodeCamp*

Python Fundamentals, *Datacamp*

Web Development with React and MongoDB, *Udemy*

ACTIVITIES

Google Developers Student Club - UOK Karachi, Pakistan

Public Relations Lead Jan 2023 - Sept 2023

- Led student outreach initiatives and organized technical workshops engaging 250+ students while connecting participants with mentorship and career opportunities.

B17 Fund Initiative Karachi, Pakistan

Volunteer Feb 2025 - Present

- Conducted mock interviews, mentored students, and supported educational initiatives through volunteer-led learning and career readiness programs.
